Professional Summary

Backend Engineer with strong experience building scalable RESTful APIs and working with distributed systems using Node.js. Experienced in deploying production applications on AWS using Docker and CI/CD, alongside secure payment integrations and MongoDB optimization.

Core Competencies

Node.js | REST API Design | Microservices Architecture | System Design | Scalability | High Availability | Caching (Redis) | Rate Limiting | Authentication (JWT, OAuth2) | Payment Integration | AWS | Docker | CI/CD

Technical Skills

- **Backend Architecture:** Node.js, Express.js, RESTful APIs, Microservices, Webhooks, Socket.io
- **Database Management:** MongoDB (Aggregation, Indexing, GeoJSON), MySQL, Redis
- **Cloud & Infrastructure:** AWS (EC2, S3), Docker, Nginx, GitHub Actions (CI/CD)
- **Security & Payments:** JWT, OAuth2, Role-Based Access Control (RBAC), Razorpay API, Stripe API
- **Development Tools:** Git, GitHub, Postman, Jira, Linux/Shell Scripting, JavaScript (ES6+)

PROFESSIONAL EXPERIENCE

Software Development Engineer (Backend)

Time Diginitor Build Pvt. Ltd. | Pune | Sep 2024 – Apr 2025

- Designed and deployed **15+ scalable REST APIs**, supporting authentication, subscription systems, and business directory services.
- Improved system performance by **reducing API latency by 40%** through MongoDB indexing and query optimization.
- Built a **secure authentication system** using JWT, refresh token rotation, and RBAC for fine-grained access control.
- Integrated **Razorpay payment gateway** with fault-tolerant webhook handling and retry mechanisms.
- Containerized services using Docker and implemented **CI/CD pipelines** via GitHub Actions, deploying on AWS EC2.
- Ensured **high availability and fault tolerance** in backend services under production workloads

MERN Stack Intern

PNinfosys, Gwalior | Jan 2023 – Jan 2024

- Developed **scalable backend architectures** for e-commerce and real-time applications.

- Built a **real-time messaging system** using Socket.io with JWT-based secure communication.
- Integrated **Stripe payment gateway** for secure checkout and transaction workflows

KEY PROJECTS

Distributed MERN E-commerce Platform | github.com/jayrajrao/mern-ecommerce-frontend

- Architected a **scalable e-commerce backend system** handling concurrent users, product catalog, and order workflows.
- Designed optimized REST APIs ensuring **low latency and high throughput under load**.
- Implemented **secure Razorpay payment flow** with signature verification and order validation.
- Applied modular architecture and separation of concerns for maintainability

Tech Stack: React, Node.js, Express.js, MongoDB, Razorpay API, JWT

Live Business Listing & Subscription Platform

- Built backend services for a **production-grade SaaS platform** managing listings and subscriptions.
- Implemented **GeoJSON-based location search** for fast and accurate query results.
- Designed **subscription lifecycle management system** using Razorpay webhooks.
- Optimized database queries for **scalability and fast retrieval under load**

Tech Stack: Node.js, Express.js, MongoDB, Razorpay API

Education

- **B.Com** – Maharishi Mahesh Yogi Vedic Vishwavidyalaya (2020 – 2023)
- **Relevant Learning:** Data Structures, Backend Development, Database Design, Cloud Computing (Self-Learned)

Languages

- English – Professional Proficiency
- Hindi – Native
- Marathi - Professional Proficiency
