PROFESSIONAL SUMMARY

Backend Engineer with 1+ year experience building scalable, high-performance backend systems using Node.js and Express.js. Proven track record of reducing API latency by 40% through optimization, caching (Redis), and efficient database design. Skilled in designing RESTful APIs, microservices architecture, and deploying production-grade applications on AWS using Docker and CI/CD pipelines. Strong expertise in secure authentication (JWT, OAuth2) and payment integrations (Razorpay, Stripe).

CORE SKILLS

Node.js, Express.js, REST API Development, Microservices Architecture, System Design, Distributed Systems, MongoDB, MySQL, Redis, AWS (EC2, S3), Docker, CI/CD, JWT, OAuth2, RBAC, Razorpay, Stripe, Webhooks, Nginx, Socket.io, Git, Linux

PROFESSIONAL EXPERIENCE

Software Development Engineer (Backend)

TimeDiginitor Build Pvt. Ltd., Pune

Sep 2024 – Apr 2025

- Developed and deployed 15+ scalable REST APIs for authentication, subscription systems, and business workflows
- Reduced API latency by 40% through MongoDB indexing, query optimization, and Redis caching
- Implemented secure authentication using JWT, refresh tokens, and role-based access control (RBAC)
- Integrated Razorpay payment gateway with robust webhook handling and retry mechanisms
- Containerized applications using Docker and deployed on AWS EC2 with CI/CD pipelines
- Improved system reliability and ensured high availability under production workloads

MERN Stack Intern

PN Infosys, Gwalior

Jan 2023 – Jan 2024

- Built backend services using Node.js and Express.js for scalable applications
 - Developed real-time chat system using Socket.io with JWT-based authentication
 - Integrated Stripe payment gateway for secure transactions
 - Collaborated in Agile environment to deliver production-ready features
-

PROJECTS

MERN E-commerce Platform

- Architected scalable backend handling users, products, and order workflows
- Designed optimized REST APIs ensuring low latency and high throughput
- Implemented secure Razorpay payment flow with validation and signature verification
- Applied modular architecture for maintainability and scalability

SaaS Subscription Platform

- Built backend services for subscription lifecycle and business listings
 - Implemented GeoJSON-based location search for efficient querying
 - Designed webhook-based subscription system using Razorpay
 - Optimized database queries for high performance under load
-

EDUCATION

Bachelor of Commerce (B.Com)

Maharishi Mahesh Yogi Vedic Vishwavidyalaya

2020 – 2023

ADDITIONAL INFORMATION

- Immediate Joiner
 - Open to Backend / Node.js Roles
 - Willing to Relocate / Remote
