

JAYRAJ RAO

Backend Node.js Developer

jayrajrao15@gmail.com | +91 8269543853 | linkedin.com/in/jayraj-rao | github.com/jayrajrao | jayrajrao.vercel.app

PROFESSIONAL SUMMARY

Backend-focused Node.js developer with experience building and shipping production systems end-to-end: a live mobile-app backend (Google Play, 100+ installs), a multi-role e-commerce platform with vendor approval and admin workflows, REST APIs, authentication systems, and payment-plan integrations. Comfortable across Node.js, Express.js, MongoDB, Redis, AWS, and React.js, with a track record of learning fast and taking features from spec to production.

CORE SKILLS

Node.js, Express.js, REST API Design, MongoDB, JWT Authentication & RBAC, Razorpay Payment Integration, AWS (EC2, S3), Redis, WebSockets, Firebase Cloud Messaging (FCM), PM2, React.js, Next.js (basics), TypeScript (basics), Tailwind CSS, EJS, Git/GitHub, Basic Flutter (cross-functional collaboration)

PROFESSIONAL EXPERIENCE

Software Development Engineer (Backend) — Time Dignitor Built Pvt. Ltd., Pune

Sep 2024 – Apr 2025

- Built backend (Node.js, Express, MongoDB) for “Everyone at Service,” a local-services marketplace app now live on Google Play with 100+ installs, still active and maintained today.
- Designed and implemented a 60–70 category / sub-category system for service listings, working closely with the app’s Flutter frontend to keep category logic in sync.
- Integrated Razorpay for subscription/plan selection on provider listings, and built the create-post and location APIs used across the app.
- Built secure authentication using JWT, refresh tokens, and role-based access control (RBAC) for provider and admin roles.

MERN Stack Intern — PN Infosys, Gwalior

Jan 2023 – Jan 2024

- Completed a structured MERN stack training path from HTML/CSS/JavaScript fundamentals through to full-stack development with Node.js, Express, and MongoDB.
- Independently built and deployed two full-stack applications under mentorship: a course-enrollment portal (NSMS) and a tech blog platform (ArticleFlow).
- Developed real-time chat functionality using Socket.io and JWT-based authentication.

Freelance & Self-Directed Development — Remote

Apr 2025 – Present

- Independently designed and built a complete multi-role e-commerce backend and admin/vendor dashboards (see Projects) — architected, coded, and tested every API end-to-end.
- Delivered freelance web projects including a landing page and a business website for clients.
- Self-taught and applied AWS (EC2), PM2 process management, Redis, and WebSockets to strengthen backend and deployment skills; currently building the backend for a property rental/PG listing app with geolocation search and in-app chat.

PROJECTS

Multi-Vendor E-Commerce Platform (Personal) — Node.js, Express, MongoDB, React, Razorpay, Cloudinary

- Built a production-style e-commerce backend with three roles (user, vendor, admin): vendor product-submission with an admin approval workflow, category management, and role-based access control.
- Implemented cart, order, Razorpay checkout, and a full return/refund workflow with status tracking; built a React admin panel for product approval and a vendor dashboard for listing management.

NSMS — Course Enrollment Portal — Node.js, Express, EJS, MongoDB

- JWT-authenticated portal where users submit course enrollment forms and track status; admin panel for reviewing and approving/rejecting applications.

ArticleFlow — Tech Blog Platform — Node.js, Express, EJS, MongoDB, Cloudinary

- Full-stack blog platform with categorized posts, user login/registration, and cloud-hosted images; live and publicly accessible.

EDUCATION

Bachelor of Commerce (B.Com) — Maharishi Mahesh Yogi Vedic Vishwavidyalaya Completed 2023
